Renewable Energy Sources Lise Bosman 2013-01-06 In recent years African countries have taken great strides in their response to the demand for reliable contractual and institutional forms of doing business and for high-quality dispute resolution mechanisms. Modern international arbitration has taken root, with certain countries actively embracing modern harmonized arbitral practice, and others in the process of change and development. This unprecedented volume assembles for the first time a country-by-country analysis – both practical and insightful – of how arbitration is conducted in 46 African countries, providing essential information about legislative provisions, treaty adherence, and arbitral procedure. Contributors include current and former judges, distinguished practitioners, academics, and institution-builders, all of whom are active in promoting the use of arbitration as a viable means of dispute resolution in Africa. Five sections representing the main regions of the continent, each with a substantive introductory chapter covering the major trends within that region, offer country overviews addressing issues such as the following: ; adherence to the key arbitration conventions; the modernity of a State's arbitration legislation and its compatibility with the UNCITRAL Model Law; particular features of arbitral practice in that jurisdiction; access to and (where available) statistics from local and regional arbitral institutions; significant arbitration-related national case law; and enforcement of foreign arbitral awards. A sixth section focuses on Africa-based investor-State arbitration, providing an empirical analysis of the experience and record of African States with investment treaties and investor-State arbitration. Useful tables of intra-African bilateral investment treaties, a list of ICSID proceedings involving African States, and other tabular features round out the volume. The book will be welcomed by arbitration practitioners and legal academics everywhere as the essential guiding light in what is rapidly becoming a crucially important area of international arbitration practice.

The Independence of the News Media Loïc Ballarini 2020-10-16 This book explores the different ways Francophone research on news media has faced the challenges of dependence and independence from three complementary perspectives. The first is economics - how can sustainable business models be developed and to what extent can crowdfunding help to maintain the financial and editorial independence of newsrooms? Secondly, in a time where the role of journalism in the public sphere is more questioned than ever, the authors evaluate to what extent

news media can embody the needs of their readers. Thirdly, the authors consider the historical and political context of publication in the light of the 'Arab Spring'. This book deals with major, contemporary evolutions of news media, bringing together research that considers the media in France, Canada, and the Arab region (notably Tunisia, Algeria, Morocco, and Egypt). Using numerous case studies, this book helps to define how complex the question of independence is today.
